VOL. 9 NO. 16 | Lancaster Farming, Saturday, March 21, 1964 | $2 Per Year

CHAMPIONSHIP LOINS FROM the hog carcass evaluation program Wednesday, sponsored by the Lancaster County Swine Producers Ass'n, are examined by, left to right, John Henkel, Strasburg R1; Dwight Younkin, Penn State, and James Martin, Christiana R1. Henkel holds a loin from his Yorkshire gilt while Martin has a loin from a Spotted barrow shown by C. Warren Leininger, Denver R2, Leininger was not present for the picture. L. F. Photo.

No Meat Type Hog Breed Specialist Tells Hogmen

There is no meat type breed of swine, a livestock specialist said Wednesday.

Dwight Younkin, extension livestock specialist from the Pennsylvania State University, told Lancaster County swine breeders at a carcass evaluation program, "There are meaty hogs in all breeds, and there are poor ones in all breeds."

He said that carcass shows in Pennsylvania and around the country have shown no single breed dominating the winnings

The program at the packing plant of Kunzler and Co, Inc, was a follow up evaluation of hog carcasses judged on foot by breeders at the Stock Yards on Monday

An estimated 50 persons compared the carcasses with the live placings of 18 hogs consigned to the evaluation.

Beaver County Yorkshire Wins Annual Hog Show

White hogs took all the top honors in the sixth annual market hog show and sale Tuesday at the Lancaster Union Stock Yards.

Yorkshires dominated the Lancaster County Swine Producers sponsored event with only one of the major awards going to a Landrace.

Grand champion honors for individual hog as well as trio and pen of ten went to Park F Thomas, Beavertown, Snyder County. His trim 190 lb. Yorkshire grand champion commanded a bid of 62 cents a pound at the afternoon sale. Kunzler and Co, Inc, Lancaster was the successful bidder.

Kunzler also bought the other two members of the top trio for 20 cents a pound Reserve champion single went to Hershey Abattoir for 42 cents.

It was the second consecutive year that a member of the Thomas family topped the show. Last year, the honors went to a brother, Reno, who showed the reserve champion, a 190 pound Yorkshire.

William and Robert Fisher, East Earl, broke up the Yorkshire sweep with reserve championship honors for a trio of Landrace hogs.

Thomas' champion truckload of Yorkshire, averaging 227½ pounds, went out on a $17.25 a hundred weight bid of Hershey Abattoir.

The Martin packing firm also took the reserve champion pen of three, 193-pound Landrace crossbreds shown by brothers William and Robert Fisher, East Earl R1, at $17.60.

Judges Dwight Younkin and Lester Burdette, Pennsylvania State University Extension Service livestock specialists, said Yorkshire quality was especially good and "ran deep into classes."

In breed competition, two exhibiters were able to sweep both champion and reserve champion titles in individual and trio judging.

They were the Fisher brothers in Landrace and C. Warren Leininger, Denver R2, in Spotted Poland China breed competition.

Richard Maule, Quarryville R2, took three top ribbons in Berkshire judging, with George Cogley, Ronks R1, picking up a reserve trio title in Yorkshire competition behind the Thomas brothers.

The reserve champion pen of 10, however, outsold the Thomas truckload by 10 cents.

The lightweight Yorkshires were consigned by Willow Glen Farm, Strasburg R1, and bought at $17.35 by Ezra W. Martin Co, Lancaster.

Titus and Omar Beam, El-

New Service Is Offered By Poultry Center

A new marketing service is being offered to county poultrymen by the Lancaster County Poultry Association.

No sales have been held at the Lancaster Poultry Center since the exchange ceased operations on January 30 of this year, and no sales are planned. Growers may call the center either Tuesday or Thursday and list birds for sale. These listings will be available to buyers who can call the producers and make private contracts Listings will include approximate number of birds, weight, age and condition.

The Poultry Association will do no negotiating and handle

Preview Shows Local Farmers In New Film

The premier showing of the new U S. Department of Agriculture film, "One Bug is Too Many" at 8:00 p m. last night in the Livestock Exchange Room, Lancaster Union Stockyards, drew nearly 40 farmers and agriculture organization leaders.

The purpose of this film is to convey to the livestock industry in Pennsylvania the economic necessity for complete eradication of TB in cattle and to show it can be done, according to Dr R W. Boone, Veterinarian in charge, Pa Animal Disease Eradication Division.

The film shows the number

From Where We Stand . . .

March Is National Egg Month

March is Egg Month.

Some wag was once heard to say that the moth in a cocoon is the only animal he knew that could eat its way out of trouble.

Now along comes a group of businessmen in Missouri with the idea that we can eat our way out of some of our over supply of foodstuffs.

The Chamber of Commerce in the town of Poplar Bluff, Butler County is sponsoring a campaign for "Better Breakfasts".

A hotel dining room full of hungry school youngsters and their parents were treated to a nutritious model breakfast planned by the county home agent. The children received campaign kits, of information about well balanced breakfasts, which they took back to their classrooms.

There was even a contest with prizes for the four boys and girls who did the best job of telling their classmates about the advantages of eating good breakfasts.

From where we stand, this looks like one of the better suggestions proposed for easing the food surplus situation.

Think of the possibilities. If only one person in each 175 in this country would eat only one more egg for breakfast for one week, almost seven million eggs would be taken out of storage. A parallel could be drawn for almost every other food commodity.

Furthermore, nutritionists have again and again told us that a good breakfast is essential to good health.

But then what about the other big American problem — overweight?

We know that a given amount of calories produces a given amount of energy, and if that energy is not burned up it will be stored in the body as fat.

Missing breakfast is one of the better ways to trigger the body mechanism into laying on surplus tissue. After an all night fast the body is in need of energy. If no food, or only a small amount, is consumed two things happen.

The energy level dips low. The capacity of the body to do work is lowered. The person becomes lethargic and does less work or works at a more leisurely pace burning up less of the stored enegry.

In the second place the body tissues become so depraved that there is a tendancy to overeat at the next meal and further lethargy results later in the day leading to a vicious cycle

When food bins in this country are bulging and conservative estimates show that 20 per cent of the high school students are not getting a properly balanced diet, we feel that it is time for all farmers to get behind movements such as this one in Missouri Better breakfasts are a step toward a better day.

At least that's how it looks from where we stand.

Kite Flying Weather

Kite flying time is here again. It is one of the oldest and best juvenile diversions, but it appears there have been quite a few changes in this venerable and respected pastime.

Consider this list of "don'ts" for kite-flyers printed recently by a gas and electric company. With the possible exception of one of the eight rules, Grandpappy, or even Pop, in his childhood days would not have needed these rules which are all worthwhile today.

Here are the rules as listed: 1. Don't fly a kite with a metal frame or tail; 2. Don't use tinsel-string, wire or twine that has any metal in it; 3. Don't fly a kite near electric power lines; 4. Don't fly a kite over radio or television aerials; 5 Never pull on a string or climb a power pole to loosen a snagged kite; 6. Don't touch fallen electric wires; 7. Don't run across streets or highways while flying kites; 8. Don't fly a kite in the rain.

We believe it would be well to teach these safety rules to rural as well as urban children before they try their hand at the ancient skill.

We can't help remembering, though, one of our favorite kites from way back in the dim past. As a lot of you old timers will remember, you couldn't go to the corner store and purchase a ready-cut kite with string, staves and paper. If you wanted a kite, you made one out of whatever materials were at hand.

The kite we remember was a giant one made on an umbrella stave frame and covered with wrapping paper. We couldn't find a string strong enough to stand the pressure, but we did locate some fine wire that would do the trick. It took the combined efforts of three small brothers to launch the mammoth thing, but finally it was airborne and we tied the wire to a fence post.

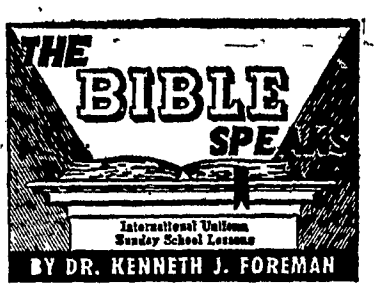
A sudden gust of wind snapped the wire and our precious behemoth was last seen wobbling out over the woods toward the river.

In view of the rules laid down by the power company, it was probably a blessing that the monster did get away, but in our back pasture, the nearest power lines were almost a mile away The nearest highway was nearly as far, and the only radio aerial within miles was strung between the corner of our house and the chicken coop just slightly more than head high. The only television antennaes were about 15 years in the future The season of thunderstorms was still several months away, but if we could have kept our giant on its leash, we would have had it until mid summer.

At any rate, the rules for safe kite flying in this day are good ones Kite flying can be fun and still be safe. We hope we don't have to report any casualties due to this pleasant pastime.

Perhaps this is what the poet had in mind when he said, "Beware the ides of March".

At least that's how it looks from where we stand.



How Two Men Died

Lesson for March 22, 1964

Background Scripture: Luke 23:32-47.
Devotional Reading: Luke 23:44-56.

DEATH CAME to three men on the same afternoon. We cannot say that "as it must to all men, death came to these," for the three died by cruel violence. They died, in fact, by being executed. It was a form of death that was meted out only to the most degraded of men — traitors, slaves, the worst of criminals. The punishment was crucifixion. We have been so long accustomed to glamorized pictures of the cross that we forget how horrible it was. Naked men were fastened with nails to their crosses. No fatal blow was struck, the men were just left to die. Gradual loss of blood would bring on a torturing thirst, and death was slow in coming. Victims often took two or three days to die, and most men would go insane before the end came.

Dr. Foreman

Death without hope

The two men crucified to the right and left of Jesus were marked as bad men, and would be considered dangerous in any country at any time. They were not "thieves" in the 20th century meaning of that word. The Greek word for them means robber, bandit. They were the kind of men who do not hesitate to commit murders in order to rob their victims. The police and the public breathe more easily when such men are executed.

One of these men died as he had lived, his hand against every man's. Hung up there to die, he kept his bitter heart to the end. Whoever had condemned him to be crucified was not now out there in the crowd. This robber hated people without reason. So he turned against Jesus and picking spoke mocking words to the dying Jesus. Ridicule can hurt more deeply than harsh words and curses. The bandit's partner on the other side joined for a while in the jeers (Matthew and Mark both recall that the two men taunted Jesus) but changed his mind; this bandit kept his bitterness and died in it.

Death under a promise

The other victims were just as dead, when sunset came, as this angry outcast. But they came to their end in a quite different way. Consider the other bandit. He was just as bad a man as his partner on the far cross; he admitted guilt for both of them, acknowledged that what they suffered, they deserved. Somehow he knew that the man on the central cross did not belong there. Whether this bandit had ever heard of Jesus, or seen him before we do not know. But criminal though he was, he had a clearer insight into the situation than all the high priests. He has done nothing wrong, he said. And then he says a strange thing to Jesus. Remember me when you come in your kingdom! he said.

Jesus answers the faith with a promise: Today you will be with me in Paradise. Just as simple as making a lunch date. Under that promise he died, not in bitterness like his partner in crime, but in hope and faith. Christians from then to now die as other men die, yet not as other men in spirit. For every Christian dies under a promise: "I am the Life."

The hour of hope

All sorts of gloomy things are said about death, and we are supposed to feel bitter about it. But Christians know better. Grace Noll Crowell wrote a poem about death, and she called it "This is His night." Saint Paul, first Christian to put on record his thoughts about death, calls it a departure, —going to "be with the Lord." Death is not merely what so many millions think it is, the end of all things. It is the end of a great deal, to be sure; but it is actually a commencement. Death ends many things but it does not end you. If that first bandit's spirit survived death—and we believe it did—what kind of future would he have? If the second man's spirit survived—and Jesus assured him it would—what kind of future would he have? Luke tells the story; he leaves us to draw our own conclusions.

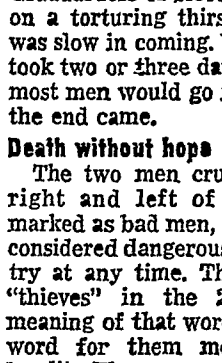
Now Is The Time . . .

BY MAX SMITH



MAX SMITH

To Use Nitrogen Carefully

The success of obtaining a good stand of alfalfa or clover in small grain is reduced when we get rank growth of the small grain. The use of 30 to 40 pounds of actual nitrogen per acre will usually give larger yields of grain but may crowd out the legume seedlings This is especially true on fertile soils Sand, gravel, or shale soils will give greater response to the nitrogen and still not be too rank to result in lodging Use nitrogen sparingly on winter grain in fertile fields.

To Compare Types of Fertilizers

We often get the question relating to the best values in granulated fertilizers or in liquid forms of fertilizer To answer the question we should carefully compare the actual pounds of plant food added to the soil including labor We're aware of reports that small amounts of liquid fertilizer per acre will give comparative results to normal granulated applications at a lower price per acre, in these cases we fear that the amounts applied in liquid form are very short in plant food per acre, and at a very high cost per unit Be careful before investing

To Lime by Test

Many successful farmers have reached the desired level of soil acidity by applying lime over a long period of years, soil tests reveal that little or no lime is needed for the average crops on these farms. Another fact in applying lime to the soil learned through research and experience is that large amounts should not be applied at one time; we normally say that no more than 3 Tons of ground limestone per acre at one time; larger amounts are expected to cause trouble and tie up the soil elements. Don't be guided by those who may recommend larger amounts at a time in order to reach the desired acidity quicker.

To Shear Sheep Early

The practice of leaving the fleece on the sheep until May or June is to be discouraged. A nursing ewe will milk better if sheared during late March or early April. The wool on some sheep will loosen and begin to fall out when hot weather arrives.

Plan Hay Drying

It takes time to install a hay drier. That's why Joseph McCurdy, extension agricultural engineer at The Pennsylvania State University, says the time to plan for the installation is when the haying season is still a few months away. A barn hay drier helps beat the weather, cuts down leaf losses, and increases total digestible nutrients.

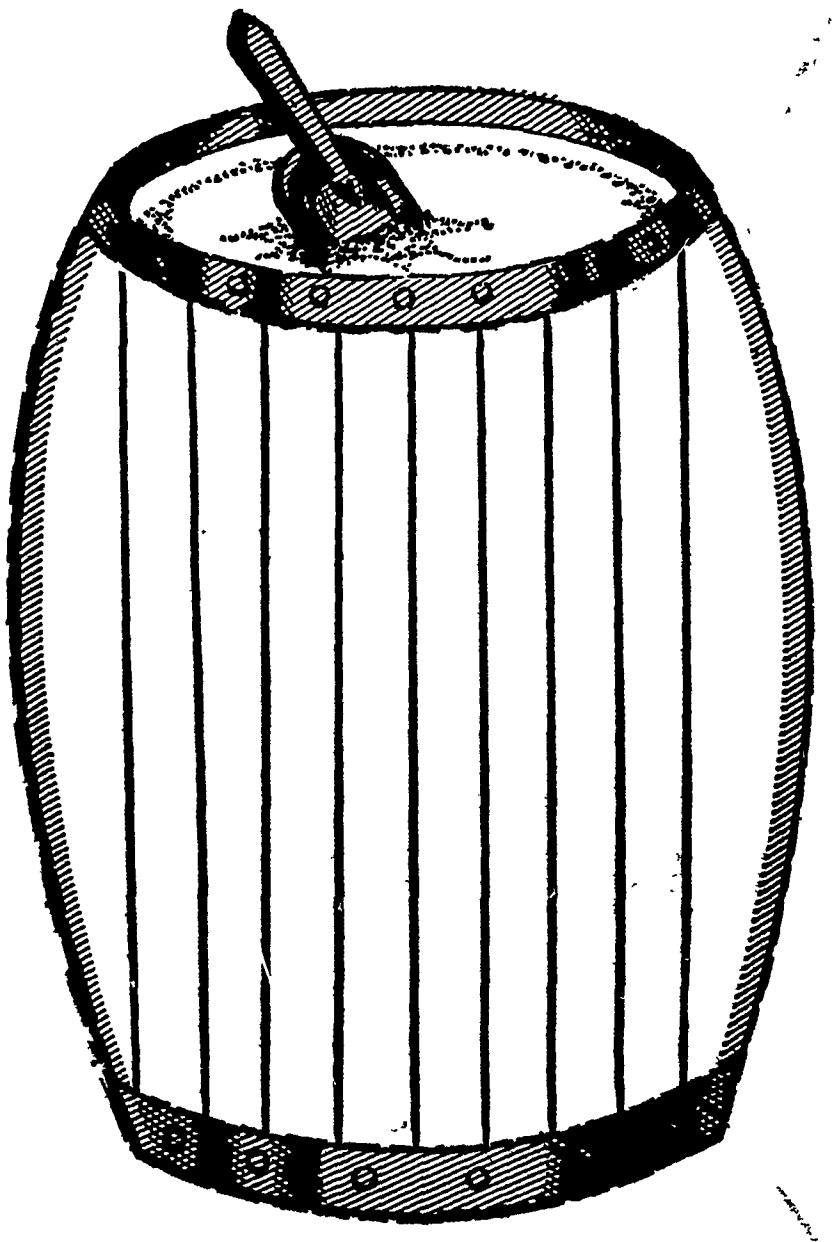
AT MILLER & BUSHONG . . .



MUCH HAS BEEN CHANGED . . .

Throughout the mill many techniques have changed as new, more efficient ways of manufacturing feed are being developed constantly.

These dynamic new methods, dramatic as they are, would mean but little to you.

Except for one fact, which we hope* NEVER TO CHANGE. *What is it?

Our determination that no matter what technical changes come along, QUALITY WILL ALWAYS BE OUR MOST IMPORTANT INGREDIENT.

More Milk at Less Cost with Green Pastures Dairy Pellets!

GREEN PASTURES DAIRY PELLETS contain high-quality protein that provides the amino acids your cows need to produce larger quantities of milk. GREEN PASTURES DAIRY PELLETS provides vitamin supplements and nutritional values which keep cows healthy. Progressive dairymen who feed GREEN PASTURES DAIRY PELLETS find that their herds are responding with more milk at lower cost per cow.

of people involved in a successful traceback and the need for their full cooperation to eradicate this disease.

Farms pictured in the movie are situated in Lancaster Co. Wilmer D. Rohrer, Lancaster R2, and V. Ferry Rohrer, Columbia, R2, own the two farms. Trucks shown were provided by Arthur Becker, Mt. Joy, and Oliver Sensenig, Lancaster.

Pennsylvania Bureau of Animal Industry and Animal Disease Eradication employees appeared in the film along with three professional actors. Wilmer D. Rohrer appeared in the film as Stanley Voss, a cattle owner.

The procedure depicted in the movie is in complete accordance with the cooperative tuberculosis eradication effort in Pennsylvania by the Pennsylvania Bureau of Animal Industry and the Animal Disease Eradication Division, Dr. Boone said.

● Poultrymen

(Continued from Page 1)

poultry disease information from Dr. Robert Gentry of the Poultry Disease Laboratory at Pennsylvania State University. Management and Sanitation Programs that effect disease control will be discussed along with the specific diseases of leucosis and current developments in C R D. control. Effects of isolation practices in relation to leucosis control will be specifically discussed as well as hopes for the future in the general disease picture.

The program will also feature Dr John Shutze, a recent addition to the Pennsylvania Poultry Extension Staff from Washington State. Dr. Shutze will cover lighting, a subject on which he has done considerable research. He will discuss various types of lighting systems in use today and give principles which should be followed in order to effectively use various types of housing in existence today.

Clyde Wissler Wins Three Awards At Grassland Chapter Banquet

Clyde Wissler won three top awards at the annual banquet of the Grassland Chapter Future Farmers of America in the New Holland High School cafeteria.

Wissler, son of Mr. and Mrs. Eugene Wissler, New Holland R1, was named Chapter Star Farmers, and won the Lancaster County Bankers award as well as the Leon M. Graybill Memorial Award for general excellence in vocational agriculture.

The star greenhand award was split between Adam Zimmerman and Earl Weaver. National FFA Foundation awards were presented as follows: Conservation, Dale Herr; Electrification, Nelson Wert; Poultry farming, Richard Martin; Public Speaking, Glenn Weber; Dairy farming, Roy Bowman and Wilmer Hurst; Livestock farming, William Fisher and Roy Musser; Farm mechanics, Walter Musser; Farm safety, Kenneth Zimmerman and George Zimmerman, and crop production, John Campbell and Kenneth Martin.

The swine chain gilts were presented to Eugene Brendle, Clifford Horst, and Clair Bowman. The dairy chain heifers went to Glenn Hoover, Glenn Wyble and Tony Folker.

Honorary Chapter Farmer Degrees were presented to Joseph H. Freesman, Virgil Hoffman, Reed W. Kinzer, Ellis K. Mentzer, Warren R. Piersol, Jr., George A. Weaver, John A. Greer, Jack E. Keyser, Wayne S. Martin, W. Martin Muth, V. Lester Schreiber, and Irwin R. Weaver.

Buying Children's Shoes

When buying shoes for your children, choose the best fit and the best construction within your price range, suggests Bernice Tharp, Penn State extension clothing specialist. It's not advisable to buy shoes too large, and it's false economy to allow a child to wear outgrown shoes. Since each child's feet are different, it's not wise to pass outgrown shoes from one child to the next.

Prices Are Good At Farm Sales

A tractor brought $730 and plow $195 Wednesday at the Clyde K Mylin sale in Willow Street.

A combine was sold for $520, a manure spreader for $240 and a hay crusher for $360 Another tractor brought $415 and a wagon $220.

Other prices included, dry trough $56, log chain $14, water trough $30 50, water tank $50, hay $35 per ton, and straw $32 per ton.

At the John S Ressler sale, Refton, tractors brought $675 and $460. Wagons sold for $287, and $233. A grain drill sold for $370, and a hay crimper changed hands at $245.

Hay brought $39 a ton; a welder sold for $125, a copper ladel $8 35, and a copper kettle $15.50. An anvil sold for $41.

Kreider and Diller were auctioneers.

A cynic is a man who knows the price of everything and the value of nothing.

Fluid Milk Sales Climb

The steady climb of Class I (fluid) milk continued for the 17th consecutive month in the New York - New Jersey milkshed during the month of February, according to E. J. Rowell, public relations supervisor for American Dairy Association and Dairy Council of New York.

"The increase of 18.2 million pounds in this February's fluid sales over the same month a year ago, brings the 17 month increase to a total of 209.8 million pounds — a 2 7 per cent growth in Class I consumption," he said.

Class I sales from October, 1961 through February 1963 were 7,821 million pounds; for October, 1962 through February, 1964, they were 8,030.8 million pounds. Class I prices for the last 17 months have averaged $5 33 a hundredweight while Class III (manufactured) prices have averaged $3.09 - a difference of $2 24 per hundredweight.

"This growth in fluid sales has meant about $4,669,520 in added income for more than 42,000 producers in the milkshed," Rowell pointed out.

Potato Stocks Above Average

HARRISBURG — Stocks of Pennsylvania potatoes in the hands of growers, local dealers, and chippers on March 1 were estimated at 1 3 million hundredweight according to the Pennsylvania Crop Reporting Service This is the lowest March 1 stocks since the 1, 250,000 cwt recorded in 1958 and the second lowest since monthly records began in 1949.

The March 1 stocks were 19 per cent below a year earlier and 10 per cent bleow the 1958-62 average.

Total stocks held on March 1 amounted to 19 per cent of fall production compared with 23 per cent on March 1, 1963, and the 5-year average of 21 per cent.

Local Men On Plow Matches Committees

Two local men are on the state plowing contest committees according to Charles M Wolgemuth Hershey, president of the contest.

Amos Funk, Millersville is a member of the safety committee headed by Carson F Mertz, Harrisburg.

Charles W Passmore, Lancaster, is a member of the publicity committee Norman Eberly, Harrisburg is chairman

The contest will be held July 29 near Edenville, Franklin County. All contestants must prove their ability in county contests prior to the state meet

Farm Women 15 Plan Show

Farm Women Society 15 is planning a luncheon and fashion show to be held April 1 in the Union Presbyterian Church, Kirkwood The ways and means committee is in charge with Mrs Martin Greenleaf as chairman

Plans were announced at a recent meeting in the home of Mrs Melvin Boyce, Collins Assistant hostesses were Mrs. Melvin Boyce Jr , Mrs Grable Herr and Mrs Carl Johnson.

Roll call was answered by "a bad habit I should break." The meeting was presided over by Mrs John Frantz, president. Mrs Johnson gave the devotions

A donation was voted to the Red Cross Heart Haven, Easter Seals and to Mrs Helen Bushong for books to Africa. Members will sew at the General Hospital on April 7.

A new member was welcomed to the Society. She is Mrs John Clendennin A bus is planned for the World's Fair on May 9, leaving from Lancaster

The program was given by John W Beattie estate planning officer of the Lancaster County Farmers National Bank His topic was "You Can Have Your Will Made Free If You Can Afford the Price"

A birthday auction was held with Mrs Greenleaf as the auctioneer The next meeting will be held on Thursday April 16 at Middle Octorara Church

Feeders everywhere are talking about Ful-O-Pep Cattle-izer Beef Supplement

In feedlot after feedlot—commercial and farm—feeders are reporting better gains and conversions at lower feed cost.

The reason: It's Ful-O-Pep Cattle-izer Beef Supplement . . . designed to enable the beef animal to get up to 20% more energy from the same amount of feed . . . and to use that extra energy for faster, more efficient gains.

Gain, efficiency of gain, cost of gain, market value of cattle, and other factors are reflected in net return. And *net return,* cattlemen are reporting, is higher when Ful-O-Pep Cattle-izer Beef Supplement is fed.

BLUE RIBBON WINNERS IN THE 4-H Forestry club roundup are, left to right, Robert Henry, New Providence R1, David Fyock, Lititz R1, and Dale Shenk, Lititz R3. L. F. Photo.

● 4-H

(Continued from Page 1)

R1, and Dale Shenk, Lititz R3, shared blue ribbon honors with combined scores for exhibit and project records in forestry projects

Judge, James Williams, District Game Protector, put the top wildlife award on the exhibit of Miss Annette Long, Lititz R3. Miss Long, a third year member, exhibited a model of a beaver lodge complete with dam and water Her exhibit included a stump of a tree felled by a beaver, sticks and twigs barked by beavers, and chips picked up at the site of a beaver dam A mounted beaver completed the display.

Eric Stoner, 1051 Eden Road, a second year member, displayed bird feed and feeder, a lamp he had made from deer feet, and a baby groundhog he had mounted.

First year member, Michael Hosler, Manheim R4, displayed several home made bird feeders to win top spot in that di-

(Continued on Page 9)

● Carcass Show

(Continued from Page 1)

They were not part of the swine producers association show and sale on Tuesday.

Younkin said hog cracass quality was high, but noted several soft loins in the dressed sides He could offer no explanation for the soft loins, but said it appears to be connected with excitability of the hogs before slaughter.

Exhibitors who have a large number of stock on the show circuit seem to have more trouble with the problem, he said.

A spotted barrow shown by C Warren Leininger, Denver R2, was given the top score in the carcass class The 210 pound barrow had only 1 5 inches of backfat while showing a 5 4 inch loin eye and dressing out a whopping 38 1 per cent ham and loin.

The top seeded hog in the on-foot evaluation placed second in the carcass class while Leininger's home bred entry was not considered in the final placings on Monday.

Hanging second in the on-rail judging was the 220 pound Yorkshire of John H Henkel, Willow Glen Farm, Strasburg R1 The gilt dressed out 37.4 per cent ham and loin with a 4 3 inch loin eye and only 1.2 inches of backfat.

Park Thomas, Beavertown had a Yorkshire in third place on-rail. His 205 pound Yorkshire had 37.5 per cent in ham and loin, a 4.6 inch loin eye and a 1.3 inch backfat covering.

Care of Marble

A marble top table needs the same gentle care as wood, remind Penn State extension home management specialists. Usually washing with clear water and a soft cloth is all that's needed, but if marble is heavily soiled, use soft water and mild soap or synthetic detergent Rinse well, then wipe dry Never use harsh abrasives or acid or alkaline cleaners on marble.

Poor weather is never an excuse for poor driving.

Same Uniform Feedmaking
Plus 13 New Features

This is a good time for a Mix-All demonstration! There are 13 new features to show you.

Come on in. You'll see the new auger feeder drive that loads ingredients at *hundreds* of speeds. See the high-speed unloading transmission that empties 2 tons of feed in 5 minutes. Then, there's the new concentrate hopper at the rear, the calibrated tank, and 9 other new and useful features.

GRINDS, MIXES, DELIVERS RATIONS

ONE THING GEHL HASN'T CHANGED, though. The Mix-All still grinds and mixes with uniform precision. In the mill, 66 thin, reversible steel hammers cut (not pound) ingredients on a big 507 sq. in. grinding surface. The ration is thoroughly mixed in the 2-ton hopper.

We'd like to prove all this with a demonstration. Why not ask us?

New Providence, Pa.

Machine Solves Problems For Pennsylvania Dairy Farmer

In 1958, John Gehman, a Pennsylvania dairyman, probably became the first man in the world to seek, through the Agricultural Extension Service, use of the 'electronic brain' for solving a farm management problem, according to R J. Becker, Farm Management Specialist, The Pennsylvania State University.

His Montgomery County Agent, Marion Deppen, recognized the possibilities in solving Gehman's problems which, he reasoned, were basically logistics Or, to put it simply: would it be more profitable for Gehman to spend more time milking and managing cows by reducing the time he spent growing feed crops?

Farm management specialist R. J. Becker (center) holds punched paper tape on which computer has communicated solutions to farm problem of dairyman John Gehman (right, with wife). Gehman said, "Your machine was right."

Results of computer solutions over the following years have borne out in practice what Deppen guessed was possible. Gehman has doubled his herd to 120 cows, installed a new milking system and uses a different method of cropping. He said, "Your machine was right."

Deppen warned Gehman that the experiment might not work. Gehman's response was that whatever answer the machine gave he would still make up his own mind.

Another possible world first: In December 1963, Paul Balliet, a Northampton county farmer, reported a farm problem to a computer my mail His problem arrived at the University on a questionnaire form in his own handwriting He and Sam Lewis, his county agent, had filled it out together

"We are experimenting to find the quickest possible means of answering a farm problem," Becker says.

Using a questionnaire is something new. The farmer, with the help of his county agent, would fill it our and mail it to the University. The computer then provides the answer which is usually a series of alternative solutions. This information would go back to the farmer by way of the county agent who then would discuss the alternatives with him.

As this program develops, county agents will receive training and become equipped to function in this special area of computer applications. The most important responsibility of the county agent, Becker emphasizes, is to recognize and secure the vital information. The new questionnaire will help the county agent collect the necessary data.

Dairy herd data from over 6,000 participating farmers goes through electronic computers at the University which report the dairy practices of the farmers and the results achieved This information is used as part of an educational program to guide dairymen in the improvement of herd management on the dairy farms of Pennsylvanna. Similar recordkeeping and analysis systems are in view for poultry, swine and other farm enterprises

LOOK FOR QUALITY

Every house hunter's goal is to buy a home built with quality materials without paying a premium One quality item to look for is a roof of heavyweight asphalt shingles with the "wind resistant" label

Local Man Joins National Breeding Firm

Ray R. Harbold of Elizabethtown, Pa. has been assigned to the Lower Dauphin County and Upper Lancaster County area as herd technician for Curtiss Breeding Service

He will work with Clifford Gibble under Pere L. Wickes, of Lebanon, Pa. local distributor for the nation-wide artificial breeding firm, in making the services of 165 sires of 14 dairy, beef and dual-purpose breeds available to cattle raisers

Harbold qualified for the post through successful completion of an intensive two-week training course at the Curtiss headquarters farm in Cary, Illinois

Desserts As Gay As An Easter Bonnet

By Mrs. Richard C. Spence

SPENCE

Just as the beflowered bonnets that blossom in store windows long before Easter bring visions of spring a beautiful dessert on your dinner table can counteract cold gray skies outdoors Just as the Easter season seems to mean a change of look in clothes (no matter what the thermometer may say) so it is time to take a look at the foods we are serving our families and see where we might be able to improve on them

Everybody loves a gay dessert and there isn't a better time than Springtime to try some new ones Good desserts need not be complicated Some of the best ones take little preparation time — many can be prepared at your leisure and tucked away in the freezer for later use

Pink and pretty as a fruit tree in bloom are Creamy Cherry Squares.

CREAMY CHERRY SQUARES

- 4 cups corn flakes or 1 cup packaged corn flake crumbs
- 2 tablespoons sugar
- ¼ cup soft butter or margarine
- 2 cups (1 pound 6-ounce can) cherry pie filling
- 1 cup milk
- 1 cup dairy sour cream
- 1 package (3¾ ounces) instant vanilla pudding

If using corn flakes crush into fine crumbs Combine corn flake crumbs sugar and butter in 8 x 8-inch pan; mix well. Reserve ¼ cup crumbs mixture for topping Press remainder evenly and firmly in bottom of pan Chill.

Pour cherry pie filling over Crumbs crust Chill thoroughly at least 2 hours About ½ hour before serving, blend milk and sour cream in mixing bowl Add vanilla pudding. Beat with rotary beater until well-blended, about 1 minute. Top cherries with pudding mixture Sprinkle reserved Crumbs mixture over top Chill. Cut into squares to serve 9 servings.

* * *

Prepare Pineapple Bavarian Squares as an elegant surprise for a special occasion This dessert will also get honors for appearance

PINEAPPLE BAVARIAN SQUARES

- 3 cups corn flakes or ¾ cup corn flake crumbs
- 2 tablespoons sugar
- ¼ cup soft butter or margarine
- 1 tablespoon unflavored gelatin
- ½ cup water
- 2 cups milk
- ½ cup sugar
- 4 egg yolks
- ½ teaspoon vanilla flavoring
- ½ cup whipping cream
- 1⅔ cups (13½ ounce can) crushed pineapple, undrained
- ¼ cup sugar
- 2 teaspoons lemon juice
- ⅛ teaspoon salt
- 1½ teaspoons unflavored gelatin

If using corn flakes, crush into fine crumbs Combine corn flake crumbs sugar and butter mix well Press evenly and firmly into bottom of 8 x 8-inch pan Chill

Soften gelatin in water Scald milk in top of double boiler Add softened gelatin and sugar, stirring until dissolved Beat egg yolks slightly, stir in small amount of hot mixture Return to remaining hot mixture and cook over hot but not boiling water until slightly thickened, about 2 minutes, stirring constantly Remove from hot water, stir in vanilla, cool until mixture begins to set Whip cream until stiff, fold into gelatin mixture Spread over crumbs crust Chill until firm.

Combine remaining ingredients, heat to boiling, stirring gently Remove from heat. Cool until thick and syrupy. Beat lightly until fluffy; spread over Bavarian layer. Chill until set Cut into squares; serve garnished with whipped cream and additional pineapple, if desired.

* * *

Everybody loves peaches, and here's an elegant peach dessert called Peek-A-Boo Peaches, baked with crisp cheese pastry

PEEK-A-BOO PEACHES

- 2 cups sliced, canned or frozen peaches
- ½ cup sugar
- 2 tablespoons lemon juice
- 1½ cups sifted flour
- 1 teaspoon salt
- ⅛ teaspoon cayenne pepper
- ½ cup (1 stick) butter
- 1 cup shredded Cheddar cheese
- ¼ cup peach juice
- 2 tablespoons butter
- Ground ginger
- Vanilla Ice cream

Drain peaches reserving juice to be used in making dough Mix peaches, sugar and lemon juice; place in baking dish (4-5 cup). Sift together flour, salt and cayenne pepper Cut in ½ cup butter until mixture is crumbly; mix in Cheddar cheese Add peach juice, 1 tablespoon at a time, blending with fork to make pastry dough

On lightly floured board, roll dough about ⅜ inch thick. Cut in ½-inch strips and make latticed topping over peaches. Dot with 2 tablespoons butter; sprinkle with ground ginger. Bake 40 minutes in a 350 degree oven and serve warm with vanilla ice cream. 5-6 servings

NOTE: If using fresh peaches, increase sugar to 1 cup and use ¼ cup cold water instead of peach juice in making the pastry dough.

* * *

Crunchy Banana Split is another scrumptious dessert.

CRUNCHY BANANA SPLIT

4 cups sugared corn flakes
½ cup chopped nutmeats
¼ cup butter or margarine, melted
2 medium bananas, sliced
1 quart strawberry ice cream, slightly softened
¼ cup chocolate sauce
1 cup whipping cream
2 tablespoons sugar
1 teaspoon vanilla flavoring

Slightly crush 3 cups of the sugared corn flakes, add nutmeats and butter, tossing gently Sprinkle over bottom of buttered 9 x 9-inch pan. Arrange bananas in a layer over corn flakes mixture, pack ice cream firmly over bananas. Drizzle with chocolate sauce. Whip cream until stiff; beat in sugar and vanilla. Spread over chocolate sauce Freeze. Remove from freezer about 10 minutes before serving; cut into squares Sprinkle with remaining corn flakes. Makes 9 3-inch squares.

* * *

You'll like the unusual combination of tender sweet pear halves and tangy golden pineapple, enhanced by cheese and enlivened by sour cream in this luscious Pear-Pineapple Cheese Pie

PEAR-PINEAPPLE CHEESE PIE

Pie:
Pastry for double crust pie
6 large (1 pound 13-ounce can) pear halves, drained
2 cups (1 pound can) pineapple chunks, drained
½ cup pear juice
½ cup pineapple juice
¼ cup cornstarch
¼ cup sugar
⅛ teaspoon salt
Dash of nutmeg
¼ teaspoon vanilla
1 tablespoon butter
1½ cups shredded Cheddar cheese
Egg white
Sour Cream Topping:
1 pint dairy sour cream
2 tablespoons combined pear and pineapple juice
2 tablespoons confectioners sugar

For pie: Line 9-inch pie plate with pastry In pie shell arrange pear halves, cut-side up with narrow ends toward center Arrange pineapple chunks around pear halves. Set aside In a saucepan mix a small amount combined pear and pineapple juice with cornstarch then add remaining juice Cook until clear and thickened. Lower heat and stir in sugar, salt, nutmeg, vanilla, butter and Cheddar cheese Spread cheese-fruit sauce over fruit Roll out remaining pastry and cut into ⅜ inch strips; make a latticed top on the pie Bake 12 minutes in a 450 degree oven, reduce heat to 375 degrees and bake 35 more minutes To give a golden glaze, brush lattice top with egg white for the last 10 minutes of baking Serve with Sour

Guides To Buying Frozen Foods

Shop for frozen foods last because these are your most perishable items Select them after you've done the rest of your shopping, then hurry home so they'll be out of the freezer for the shortest time possible

Choose clean firm packages The frozen food section manager tries to keep frozen-food displays neat and orderly and at the right temperature Turnover is fast and if you should come across a juice-stained or open-end carton, you may depend on its being removed as soon as it's noticed

Depend on familiar brand frozen foods and buy them with confidence New brands are coming on the market constantly to help make meal planning easier for you.

Frozen foods on special sale are not second-best ones The supermarket buyer watches his market, knows what is plentiful and of good quality, and passes his bargain on to you. So consider specials if they are foods your family likes.

Pointers On Appliance Servicing

To help you keep the cost of servicing home appliances to a minimum, here are a few

● Have You Heard?

(continued from page 15)

pointers:

Follow directions for use and care of your new appliance.

Insist on a good installation, making sure the appliance is leveled and operating perfectly.

Carefully file important records, such as bill of sale warranty, servicing contracts, and the name and address of the serviceman.

Keep receipts for service charges for future reference.

Good To Know Anytime

Extra-length sofas create moving problems If you know you'll be moving during the lifetime of your sofa, avoid buying an extra long one. Multi-purpose furniture, that's not restricted by style or scale, is a better choice especially if you're among the one of five American families that moves each year.

If your house has a fireplace, keep the damper closed when the fireplace is not in use If the damper is left open, warm room air is drawn up the chimney and you'll be heating the outdoors

Adults need fewer calories as they grow older, but their need for food nutrients doesn't lessen Adults never outgrow their need for milk They need two or more eight-ounce glasses of milk each day. They don't need to drink all the milk as beverage, but can use some of it in cooked dishes.

Sweetened condensed milk is made from fresh whole milk. Part of the water removed and sugar is added In the final product, the sugar accounts for 40 to 50 percent of the total weight.

Cooking Frozen Fish

Thawing frozen fish in the refrigerator at 40 to 50 degrees has become the accepted practice. Hold fish at this temperature only until you can handle it easily for cooking.

You can cook frozen fish fillets, steaks, and dressed fish just as you would cook fresh fish, but you'll need to allow extra cooking time. When you plan to bread or stuff frozen fish, you'll find it easier if you thaw the fish first.

There are 68,750,000 individuals under 18 years of age in this country.

(Continued from Page 15)

Cream Topping. For topping; blend together sour cream, fruit juices and confectioners sugar. Refrigerate until needed.

* * *

For a perfect ending to a delicious Easter dinner, serve cool, tangy homemade sherbets.

LIME SHERBET

1 3-ounce package lime-flavored gelatin
1 cup boiling water
½ cup sugar
2 cups milk
1 cup light cream
1 teaspoon grated lemon rind

Dissolve gelatin in boiling water. Stir in sugar, milk, light cream, lemon juice and lemon rind Pour into freezer tray Freeze until firm. Break into chunks, beat until smooth but not melted Return to cold tray and freeze until firm. Makes 6 to 8 servings.

PINEAPPLE CREAM SHERBET

1½ teaspoons unflavored gelatin
2 tablespoons cold water
2 cups buttermilk
¾ cup sugar
1 8½ ounce can crushed pineapple, drained
1 teaspoon vanilla extract
1 egg white
¼ cup sugar

Soften gelatin in cold water, dissolve over boiling water. Combine buttermilk, ¾ cup sugar, pineapple, vanilla and gelatin, mix well. Pour into refrigerator tray, freeze until firm Break into chunks and beat smooth Beat egg white until soft peaks form, then gradually add ¼ cup sugar, beating to stiff peaks Fold into pineapple mixture. Return quickly to cold tray. Freeze until firm Makes 6 servings.

Marriage: The result of a man getting hooked with his own line.

Have Your Contractor Build You a Better Home . . . at Less Cost!

Ask for STAUFFER'S Hercules Roof Trusses

READ THIS:

Stauffer's Hercules Roof Trusses . . . .

1.. Give you more flexibility of room planning. In addition you get crack-free ceilings and roofs that don't sag.

2. Save you $150 to $500 per house over conventional roof-framing methods. Self-supporting trusses do away with fitting and cutting of roof members on the job.

3. Save time and labor costs. Stauffer's special rig (shown above) plus a few men can put up roof trusses for an average house in three hours or less!

4. Save materials because self-supporting spans eliminate interior bearing partitions.

WHEN YOU THINK OF BUILDING . . have your contractor check with Stauffer and build you a better home for less money. (All Stauffer Hercules designs carry a PE Seal and meet FHA, VA and local code requirements.)

ST FOOD BUYS

eef And Chicken Are Leaders

eef chuck and rib roasts pled with frying and roast- chicken are the key fea- es at meat counters this k Canned and smoked n for early Easter buying getting special emphasis in me stores along with scat- ed buys in fresh pork. Fro- fish products are the out- nding fish values. Large ze eggs are the better buy weight. Produce counters ook about the same although ere appears to be more Val- cia oranges, strawberries, hubarb, and asparagus.

Beef Prices Rising

Beef prices on the hoof and in the meat case are expected to rise Prices on selected cuts and especially weekend features have remained relatively low compared to the high prices of late 1962 Market observers believe that the long downtrend has reached its low. Live cattle and wholesale beef prices have been rising slowly There will be relatively little change in regular retail prices but weekend features will be less numerous and a little higher priced this spring and summer.

Selected poultry items will be value priced throughout area markets this week. Fryers are picked by some stores as the price leader while others choose heavier weight birds to sell as roasters. You're sure to find some fresh pork bargains among the advertised meats this week, too. Pork prices will be on the rise as supplies begin to decrease by the end of March Broiler-fryer supplies, on the other hand are predicetd to be at least 5 per cent larger than a year ago.

Spring Is Late For Vegetables

Spring may be a little late this year as far as fresh vegetables are concerned. Many growing areas have had cold weather and not enough or too much rain which retarded growth Unless some areas get warm weather and others rain, high prices will continue on celery, corn, cucumbers, peppers, egg plant, and lettuce. There are plenty of dry onions, potatoes and carrots so perhaps you'll fix a stew or pot roast with vegetables this week.

Farm Women 7 Make Presents For Shut-In

Farm Women Society 7 made a "Sunshine Box" for a shut in member during a recent meeting in the home of Mrs. Clyde Benedict, Kinzers

The box of gifts will be sent to Mrs. Thelma Landis, treasurer of the society.

Mrs Harold Eby was cohostess and led devotions The business meeting was in charge of Mrs Aaron Denlinger, president. Roll call was answered with the first sign of spring.

Donations were made to the Easter Seals fund and the Cancer Society.

The Society will sew at the Osteopathic Hospital next Tuesday A representative from PP&L presented a program of slides.

Small Eggs Are Good Buy

Small eggs sometimes called "pullet eggs" are usually a good buy, says Herbert C Jordan, extension poultryman at The Pennsylvania State University. Small eggs are of exceptionally high quality and at 35 cents a dozen they are equal in cost to large eggs selling for 46 cents a dozen Three small or pullet eggs are about the same as two large eggs.

Try A Classified

Egg Production Below Average; Up From 1963

HARRISBURG — February egg production in the commonwealth totaled 253 million, 9 per cent below the 1958-62 average for the month but 1 per cent above a year earlier, according to the Pennsylvania Crop Reporting Service.

The average number of layers during the month, totaled 14,785 000, was the lowest February average since 1936.

Production per layer during February averaged 17 14 eggs — the second highest of record for the month

In spite of lower total egg production the average price received for eggs shipped from 41 cents in January to 38 cents This was twice the normal seasonal decline The sharp drop in egg prices caused the egg-feed price ratio to fall to 10 1 This is the lowest February ratio since 1960 Prices received for farm chickens remained the same as last month but average 1 5 cents below a year earlier.

Pea Growers Plan Increase

HARRISBURG — Pennsylvania vegetable processors have indicated a 16 per cent increase in acreage of peas to be planted for processing, according to the Pennsylvania Crop Reporting Service.

The March 1 estimate of 9,600 acres for 1963 and 13,-5,600 acres for 1963 and 5,240 for the 1958-62 average. The acreage intended for freezing is 3,900, up 600 acres from last year.

March 1 tomato planting intentions (for processing) show a 2 per cent increase over 1963 but a 32 per cent drop from the 1958-62 average of 14,360 acres. The estimated 9,800 acres compared with 9,*00 acres for 1963 and 13,-600 for 1962.

Pennsylvania asparagus growers expect to harvest 850 acres in 1964, or 50 acres less than last year, the PCRS estimated. The acreage includes all fresh market production plus a small amount usually delivered to processors.

BUZZ GAREY

100 Walnut Lane, Morrisville, Pa. (215) CY 5-2941

PUREBRED GUERNSEY SALE
Thursday, March 26, 1964, 12:30 Noon
At the Ass'n. Sales Pavilion, 6 mi. E. of Lancaster on Route No. 30

50 HEAD — 3 BULLS or service age

44 COWS - 3 BRED HEIFERS — VACC. - T.B., and Bangs Cert. Nearly all fresh or due within 30 days of sale date.

The bulls sired by national famous bulls, Fritzlyn Jeanette's Flash, Hominy Hill Veteran, McDonald Farms Jolly Zanton, out of outstanding dams.

The consignments from nationally known herds. Several from New Jersey, Conn., and Md. A top from Coldsprings Farm, milking close to 60 lb.

Other good ones from Liseter Farm, Lauvmont Farm, Deep Lake Farm, Conn., and Belle Terre Farms, Inc., New Jersey.

With the increased squeeze on profits for the dairy farmers it pays to make room for high producers by moving out the ones that are problem cows and those on the bottom of production capability.

We predict very reasonable prices as this is the third sale in that many weeks.

Buy Good Seed

Farmers planning to buy seed are reminded by Clarence Bryner, extension agronomist, at The Pennsylvania State University, to select varieties tested and proven superior in Pennsylvania, and then buy high-quality seed of those varieties

Keep Tree Seedlings Moist

Tree seedlings must be kept moist from the time they leave the nursery until they are planted, says E P Farrand, extension forester at The Pennsylvania State University. A good root system is essential to successful planting, so if the roots dry out rapidly they will be injured

Pa. Secretary Of Agriculture Declares War On Starlings

HARRISBURG — State Secretary of Agriculture L. H. Bull today declared war on starlings and called upon every able-bodied citizen to participate wherever possible in the fight to eliminate them.

"These pestiferous birds are carriers of two dangerous virus diseases that particularly affect people, all cattle and swine," he declared. "In addition to being the source of a disease which is known as histoplasmosis in people, they spread two viruses commonly called IBR and TGE among cattle and swine."

"Starlings are a menace to farm and city. Their presence drives away song birds and other feathered friends that are beneficial to agriculture and mankind," Secretary Bull said.

"The problem they create is particularly acute through the winter and early spring roosting season when local starlings are augmented by flocks of hundreds of thousands which migrate here over the winter from Canada.

"We cannot use poisoned baits in our fight against them," Secretary Bull cautioned. "There is a strict law against the use of poisons outside of buildings. The use of poisons for the extermination of pests inside buildings is permitted when applied by skilled exterminators," he added.

"The poison law was enacted to protect people, animals and other wildlife," the agricultural official explained, adding "we must also exercise extreme caution in the use of guns and other weapons as we battle this menace."

To become affected, people must come in contact with the excreta of the birds, according to Dr. Samuel Guss, noted veterinarian who has studied the habits of starlings because of the damage they cause among livestock.

Parents are advised to keep their children from playing where droppings of the birds are evident.

In a midwest city recently where Boy Scouts and other citizens undertook a job of clearing out a park, four of the scouts became seriously ill after working in an area in which starlings were roosting. The illness was diagnosed as histoplasmosis and was definitely traced back to the birds.

"Since these birds roost on many of the taller buildings in most cities and towns," Dr. Guss remarked, "their danger to humans is evident. The strange thing is that while the starlings carry these diseases, they are not themselves affected by either of the viruses."

One of the viruses, Infected Bovine Rhinotrachiotis (IBR) creates an acute inflammation of the air passages in cattle. It strangles the animals and often is fatal. If the disease is caught in time, some cattle can be saved through proper vaccination.

The other virus, Transmissible Gastro-Enteritis (TGE) produces violent reaction in swine, particularly in baby pigs. There is no known treatment for TGE. Most cases result in fatalities.

Representatives of various organizations from all parts of the state, in seeking counsel on the problem with Secretary Bull and other officials, concluded the war on starlings must take place if people and animals are to be protected. With starlings gone, the greater influx of other birds will take care of the problems created by insects and other smaller pests.

Milk Production Still Goes Up In Pennsylvania

HARRISBURG — February milk production per cow in Pennsylvania averaged 22.76 pounds a day. This compared with 22.58 pounds in January and 22.50 pounds for February 1963, according to the Pennsylvania Crop Reporting Service.

Daily production reached the 20-pound level in 1960 and since then has been rising steadily.

Pennsylvania milk production during February totaled 546 million pounds, 6 per cent below January and up only slightly from February 1963, but 9 per cent more than the February 1956-60 average.

There were 828,000 milk cows on Pennsylvania farms during February, 1,000 fewer cows than in the preceding month, 24,000 below February 1963 and 60,000 less than the February 1956-60 average, yet milk output was up 47 million pounds from the February 1956-60 average.

Conservation Club To Meet

The Lancaster County 4-H Soil and Water Conservation Club will meet March 23 at 7:30 p.m. at Elmer Sensenig Food Market (basement meeting room), on Route 322, between Blue Ball and Ephrata.

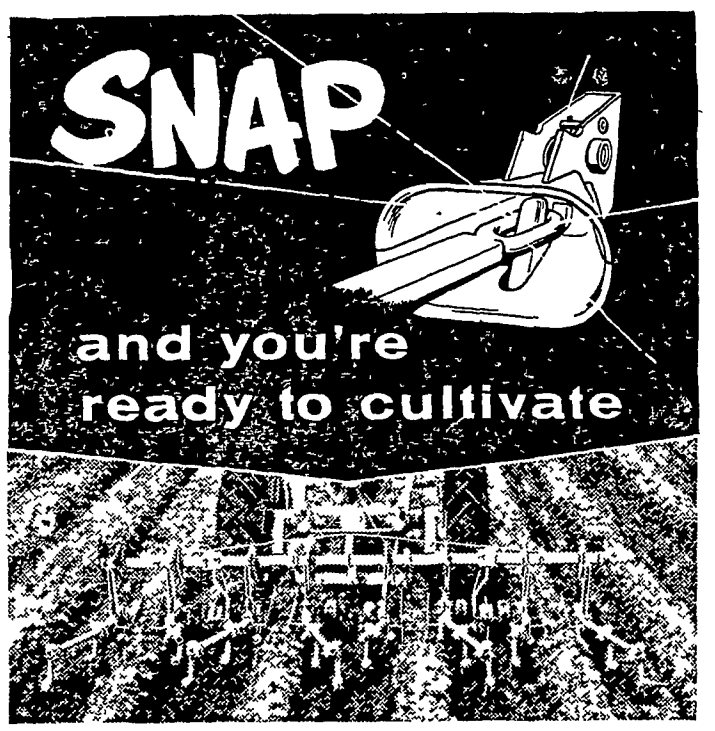
Larry Corson, acting work unit conservationist for the Lancaster County Soil Conservation Service, will present a program on the work of the service and show a film on conservation. In addition, several member demonstrations are planned.

Please invite any of your friends to this meeting who may be interested in this subject. Any boy or girl of [illegible] age may take part.

Members should come prepared to give a progress report of the activities in the record book completed.

When late, don't tail-gate. Being in a hurry is a dangerous reason for crowding the driver ahead. The Institute for Safer Living states that "tailgate" accidents now rank among top causes of auto damage, death and injuries.

Certainly one of the world's biggest deeds was one of the deeds executed by the five Indian nations in 1736 for land along the Susquehanna conveying title to an area westward "to the setting of the sun."



4-ROW REAR-MOUNTED CULTIVATOR

Here is rear-mounted cultivating convenience designed for any 2- or 4-row Allis-Chalmers tractor. And what's more, you have SNAP-COUPLER hitch. No more hookup time than with a plow. You can cultivate until mid-morning . . . be cutting grain or making hay minutes later.

The new 500 Series 4-row cultivator is pulled from a single hitchpoint — has complete flexibility to follow ground contour. Gangs are independently mounted high on a single drawbar for exceptional clearance.

Stabilizer gauge wheels keep gangs on true course. Parallel linkage assures uniform cultivation. Designed for corn, cotton, soybeans and other row crops.

SNAP COUPLER is an Allis Chalmers trademark.

Finance for profit. Ask us about Allis-Chalmers' time payment plans.
